About us

Established in 1994 in Cape Town, South Africa, we specialise in Mitsubishi Factory Automation solutions. Our comprehensive services encompass everything from VSD, PLC, RIO, and Telemetry panels to Motor Control Centres and complete turnkey process control systems for mining, industrial, and factory operations. We excel in seamlessly integrating shop floor operations with business systems. Our dedicated modular division offers tailored containerised solutions to meet specific needs.

Locations		
South Africa	Botswana	Portugal

Growth		
Year	1994	2024
Employees	2-5	30-50
Floorspace	200 m ³	> 3 000 m ³
Project capability	50,000 ZAR	50,000,000 ZAR

We provide professional project services, as well as industry-leading technical and software support to our clients and partners.

Industrial Automation Solutions – Driving Efficiency and Innovation

Our Industrial Automation Sales Division provides advanced factory automation products tailored to the manufacturing and machine-building sectors. We offer comprehensive solutions, from technical expertise to seamless integration and ongoing support. By leveraging industry trends and building strong customer relationships, we empower businesses to optimise processes and achieve sustainable growth.

Our Products:

- Programmable Controllers -PLC
- Variable Frequency Drives – VSD
- Human Machine Interfaces - HMI
- Graphic Operator Terminals - GOT
- Motion Controllers
- AC Servos Systems - MELSERVO
- Industrial Robots - MELFA
- Collaborative Robots - ASSISTA
- Low-voltage Switchgear
- Protection Relays
- Industrial Networking Products
- Engineering Software
- SCADA Solutions
- Industrial Computers
- Geared Motors

On-target Projects

Our Projects Division manages every phase of E,C&I projects, from planning and design to execution and support. With strict quality control at every step, we ensure flawless delivery and adherence to the highest standards. Success isn't just a goal—it's our guarantee. Every project. Every time.

- Planning and Feasibility
- System Design
- Development and Integration
- Implementation and Testing
- Operations and Maintenance

Service and Support

Our expert engineers deliver comprehensive electrical and software support for products and project-based solutions. Offering on-call, remote, and on-site assistance, we ensure smooth operations and optimised production lines, backed by years of industry expertise.

- Breakdown service
- Tailored Service Level Agreements
- Telephonic, Remote Assistance and On-site support

Container Engineering

Our Modular Container Division specialises in premium-grade converted shipping containers. We deliver industrial solutions like Container Pump Stations, Control Rooms, E-Rooms, and full processing plants. Our innovative, all-in-one approach streamlines the project lifecycle, including crane and rigging services, ensuring cost-effective and seamless execution across Southern Africa, and beyond.

Key Partnership

Authorised Importer, Distributor, and Official Partner of Mitsubishi Factory Automation products — a globally renowned leader in innovative industrial automation solutions.

Our Customers

We serve customers in Metals and Mining, Manufacturing, Machine and Control Systems modernisation, Machine-Builders, Water, FMCG, and many others.

Social Responsibility Initiatives

- Student in-service training
- In-project training (skills-transfer)
